

TIPS FOR IMPROVING FUEL ECONOMY

.....
**FOLLOW THESE SIMPLE TIPS TO
SAVE MONEY, IMPROVE GAS MILEAGE AND
REDUCE GREENHOUSE GAS EMISSIONS.**
.....

FOLLOW YOUR VEHICLE'S RECOMMENDED MAINTENANCE.

A well-maintained vehicle will operate more efficiently.

KEEP TIRES PROPERLY INFLATED.

Under-inflated tires require more energy to roll; properly inflated tires can improve fuel economy by as much as three percent. Buy a tire gauge and keep it handy for frequent inflation checks.

TAKE A LOAD OFF. Heavier vehicles require more energy to move. Pack light and remove unnecessary items from the car.

DON'T DRIVE AGGRESSIVELY.

Hitting the gas pedal hard after stopping, slamming on the brakes and speeding all decrease fuel efficiency.

AVOID EXCESSIVE IDLING. An idling car wastes fuel. Whenever possible, turn your car off while waiting, in drive-through windows and railroad crossings. Be safe and use common sense when turning off your car.
